EXPLORE OUR SPINNAKER CLOUD MANAGED SERVICES

Navigating the complexities of cloud management requires focused support for your IT infrastructure, specifically through comprehensive database and application support. Spinnaker Cloud Managed Services offers a wide range of services to ensure your cloud strategy is executed seamlessly and efficiently.

Cloud-Hosted Instance Management

- Comprehensive management services, for instances hosted on AWS, Azure, Google Cloud, private or hybrid, ensuring optimal performance, DB hardening, and cost-efficiency.

Database Managed Services

- End-to-end management of your database environments, including performance tuning, DB hardening, and regular maintenance.

Technical Managed Services

- Comprehensive technical support and management services to maintain and optimize your IT infrastructure.

Application Managed Services

- Dedicated support for managing your enterprise applications, ensuring they remain efficient and effective.

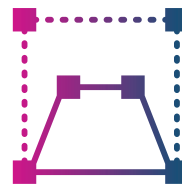

APPROACH:

Spinnaker Cloud Managed Services uses a four step process to evaluate and implement your cloud architecture.

Discovery and Assessment

We work closely with you to assess your current environment, showing you what's possible and designing a clear roadmap to achieve your ideal state.

Build, Scale and Transform

Together, we bring the strategy to life, with Spinnaker and your team collaborating to implement each step.

Plan and Blueprint – Building on our discoveries, we create a practical, actionable plan that aligns with the strategic goals identified in the Discovery and Assessment phase.

Operate and Optimize – We manage ongoing services, establish baselines, and regularly meet with you to share prioritized actions that emerge from these assessments, ensuring continuous improvement as your business evolves.
